

CALL US NOW FOR  
**INTEGRATED  
VOICE & DATA**  
with 24 VOICE CHANNELS

FOR JUST  
**\$495/mo\***

\*Offer valid  
through 12/31/2011

### COMPELLING BENEFITS

» **RETURN ON YOUR INVESTMENT**

Access some VoIP features without replacing your existing telephone system.

» **FULL T-1 OF INTERNET ACCESS**

Dynamically allocated bandwidth prioritizes voice calls and enables you to access up to a full T-1 (1.54 Mbps) of data.

» **BUSINESS CONTINUITY**

Protects against business interruption. The next hurricane and loss of electricity will not bring down your telephone system since you can access it with any broadband Internet connection.

» **COST REDUCTION**

Enables you to keep your existing phone system and lowers monthly costs by integrating your local, long distance and broadband Internet access onto a single, affordable monthly bill.

## Integrated Voice & Data Service

### THE CHALLENGE

Businesses today are looking to take advantage of the savings and advanced features available through VoIP technology, but are not yet ready to replace their existing telephone system. The ideal solution is an interim step that meets these objectives with little to no up-front cost.

### THE SOLUTION

IPFone Integrated Voice & Data Service works with your existing PBX or key telephone system to deliver low cost local and long distance calling, a full T1 of high-speed Internet access, and some of the key benefits of VoIP technology, including business continuity and disaster recovery, an administrator portal for doing service moves, adds and changes and free office-to-office calls. By combining the industry's leading VoIP technology with broadband Internet into one integrated solution, IPFone Integrated Voice & Data Service not only saves your business money, it gives you a better way to stay connected to your customers and each other.

### Integrates with following manufacturers
